PHASE I ENVIRONMENTAL SITE ASSESSMENT

PARCEL S97-032 4400 CLARK ROAD

for the

CITY OF HOUSTON

 $D_{epartment}$ of P_{ublic} W_{orks} and $E_{ngineering}$

1. SUMMARY

TLC Engineering, Inc. has completed a Phase I Environmental Site Assessment (ESAI) for 4400 Clark Road, Houston, Texas for the City of Houston. A detailed site location is listed in Section 3 of this report.

Environmental records reviewed revealed twenty-one (21) environmental sites (see 5.1 for a detailed explanation). Of the twenty-one sites, five (5) Leaking Underground Storage Tanks (LUSTs), one (1), .13 miles NE of the site, one (1), .16 miles SW from the site, and two (2), .42 miles SE, and one (1) .42 miles SW of the site required further review. Texas Commission on Environmental Quality (TCEQ's) LUST database revealed these site have been issued a final concurrence and closed or listed as no apparent threats or impacts to receptors by the TCEQ.

It is the opinion of TLC Engineering, Inc. that no potential for environmental contamination exists on the property. Please note that this summary does not fully relate our findings and opinions. Those findings and opinions are only related through our full report.

2. INTRODUCTION

2.1 Purpose

The purpose of this study is to identify, to the extent feasible, recognized environmental conditions that may exist at this location. Recognized environmental conditions, in this case, as defined by the ASTM Standard, means the presence or likely presence of any hazardous substances or petroleum products on the site from conditions that a past release occurred of any hazardous substances or petroleum products into structures on the site or into the ground, groundwater, or surface water of the site. This does not include conditions that generally do not present a material risk of harm to public health or the environment.

2.2 Detailed Scope of Services

The Phase I ESA on the site described herein conforms to the ASTM Standard Practice E 1527-00 with the amendments as per City of Houston Department of Public Works and Engineering ECRE Standard Practice (3/23/98), (Appendix C).

- (1) Environmental regulatory agency summary records were obtained for sites near the project. Following initial review, additional information was obtained through file review, field observations, and interviews.
- (2) Available historical maps, aerial photographs, and directories were obtained and reviewed to determine if current or prior land owner/occupants may have engaged in activities on adjacent properties which may have been an environmental concern.
- (3) This report was prepared summarizing our findings, conclusions, and recommendations.

2.3 Significant Assumptions

This ESA Phase I is intended for use by the City of Houston to assess the environmental conditions of the herein described real estate. This ESA Phase I is intended primarily as an approach to conducting an inquiry designed to identify recognized environmental conditions in connection with the site.

Environmental site assessments must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent environmental site assessments should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors. This environmental site assessment meets and/or exceeds E 1527-00 and is presumed to be valid for a period of one hundred eighty (180) days.

2.4 Limitations and Exceptions

This report is an instrument of service of TLC Engineering, Inc. The report was prepared for and is intended for the exclusive use of the City of Houston. Any other party without the express written permission of TLC Engineering, Inc. may not rely upon the report's contents.

The report's findings are based upon conditions that existed on the date of TLC Engineering, Inc.'s site visit and available records and should not be relied upon to precisely represent conditions at any other time. Certain indicators of the presence of hazardous materials may have been latent at the time of site reconnaissance and may subsequently have become observable.

TLC Engineering, Inc. has based the conclusions included in the report on its observation of existing conditions, its interpretation of site history, and its interpretation of the usage it was able to access. All conclusions are qualified by the fact that no borings were made and no soil, sediment, or groundwater sampling or chemical testing was conducted. Conclusions about site conditions under no circumstances comprise a warranty that conditions in all areas within the site and study area (and below existing grade) are of the same quality that TLC Engineering, Inc. has inferred from observable site conditions and readily available site history.

TLC Engineering, Inc. reserves the right to alter our conclusions and recommendations based on our review of any information obtained after the date of this report. Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by environmental consultants practicing in this or similar localities. No warranty, express or implied, is made as to the professional information included in this report.

2.5 Special Terms and Conditions

- (1) The following tasks were waived by the City of Houston:
 - a. Chain of Title Search
 - b. Environmental Liens Research

- c. Federal Emergency Management Association (FEMA) Flood Insurance Map Review
- (2) Sanborn Fire Insurance Maps were non-existent for this section of the city.

2.6 User Reliance

The City of Houston has provided TLC Engineering, Inc. with site location information related to said property.

The City of Houston has not reported to TLC Engineering, Inc. any environmental liens encumbering the site or any specialized knowledge or experience that would provide important information about previous ownership or uses of the property that may be material to identifying recognized environmental conditions.

TLC Engineering, Inc.'s findings and opinions must be considered probabilities based on professional judgment applied to the limited data TLC Engineering, Inc. was able to gather during the course of the site assessment.

3 SITE DESCRIPTION

3.1 Location and Legal Description

Physical Location - 4400 Clark Road - Houston, Texas

This site is located in the William C. Wallace Survey, Abstract #848, (Plate 1), 95° 30.990 N latitude, 29° 50.105 W longitude, in Houston, Harris County, near the intersection of Hempstead and Clark roads, and is bounded by Hempstead to the south and Clark to the east. (Plate 1).

Legal Description

A tract of land containing 8.65 acres, more or less, being a part of Tract 8 of the Resubdivision of the William C. Wallace Survey, Abstract # 848, lying North of H. & T. C. R. R. Company Right-of-Way, (according to the map of said right-of-way, recorded in Volume 572, Page 349 of the Deed Records of Harris County, Texas) in the City of Houston, Harris County, Texas, and being all of that tract of land conveyed to Russell Engineering Corporation by Deed recorded in Volume 3750, Page 544 of the Deed Records of Harris County, Texas; said tract of land being more particularly described by metes and bounds as follows:

BEGINNING AT A POINT, the intersection of the North line of Hempstead Road with the West line of Clark Road, said point lying North, 51.90 feet of the original Southeast corner of said Tract Eight (8);

THENCE North, along the West line of the fifty (50) foot wide right of way of Clark Road, a distance of 1,398.30 feet to a point, said point lying South, 147.50 feet from the original Northeast corner of said Tract Eight (8);

THENCE West, a distance of 295.2 feet to a point in the West line of said Tract Eight (8), said point lying South, 147.50 feet for the original Northwest corner of said Tract Eight (8);

THENCE South, along the West line of said Tract Eight (8), a distance of 1,154.80 feet to a point in the North line of Hempstead Road, said point lying North, 51.50 feet from the original Southwest corner of said Tract Eight (8);

THENCE South 50° 25' East, along the North line of Hempstead Road, a distance of 382.1 feet to the POINT OF BEGINNING.

3.2 Site and Vicinity Characteristics

The site is located in a mixed industrial and commercial area northwest of the central business district of downtown Houston. The site is vacant and inaccessible because of an overgrowth of vegetation. Access to the site is gained from Hollister/Clark and Hempstead roads, which are major thoroughfares that intersect. (Plate 1)

3.3 Descriptions of Structures

There are currently no structures evident on the site.

3.4 Use of Property

The site is vacant commercial property.

3.5 Current Use of Adjoining Property

The property to the north of the site is vacant commercial property. Industrial warehouses, an automotive storage and repair lot, She et Metal Fabrication are some of the businesses that are in the area. An active rail line is to the south of the site on the north side of Hempstead.

4 USER-PROVIDED INFORMATION

4.1 Title Records

Research and investigation not within the Scope of Work.

4.2 Environmental Liens

No knowledge of environmental liens regarding this site was transmitted to TLC Engineering, Inc. by the City of Houston

4.3 Special Knowledge

No specialized knowledge or experience regarding this site was transmitted to TLC Engineering, Inc. by the City of Houston.

4.4 Valuation Reduction for Environmental Issues

Research and investigation not within the Scope of Work.

4.5 Owner, Property Manager and Occupant Information

The current owner of the property is the City of Houston.

4.6 Reason for Performing Phase I

The Phase I ESA is intended to identify and document any recognized environmental concerns that may exist on the subject property.

5. RECORDS REVIEW

TLC Engineering, Inc. reviewed federal and state agency databases obtained from TelALL Corporation, HAZMAT, and TEXAS COMMISSION ON ENVIRONMENTAL QUALITY - TCEQ (formerly Texas Natural Resource Conservation Commission - TNRCC) for nearby regulated sites to determine their status, and to identify specific addresses and site names that would aid in conducting our field reconnaissance. The general boundary of the search area includes the site and extends about five hundred feet (500) from the project area for most sites, and one (1) mile for federal and state superfund sites, and federal hazardous waste sites. The environmental sites are shown on the Environment Site Summary Map on Plate 2 of this report. A copy of the environmental records reports obtained from TelALL Corporation, Appendix B is included in the report.

A complete list of all government records searched is included in the TelALL report in the Appendix B

5.1 Standard Environmental Record Sources Search Results

A total of twenty-one (21) environmental sites were identified in the vicinity of the project at fourteen (14) locations. The locations of these sites are shown on Plate 2.

Distances given are tenths of a statute mile.

Additional Environmental Record Sources 5.2

The Houston Fire Department HAZMAT (Hazardous Materials Response Unit) was contacted and requested to provide information on past Hazardous Material.

Physical Setting Sources 5.3

Topography

A review of the United States Geological Society (U.S.G.S.) 1982 Hedwig Village 7.5 Minute topographic quadrangle map shows that the elevation of the site is well above grade at 89 feet above mean sea level (MSL). (Plate 3).

Geology and Soil Characteristics

A review of the Bureau of Economic Geology 1982 Quadrangle Atlas of Teas, Houston Sheet indicates that the uppermost geologic formation underlying the study area is a Lissie Formation dating back to the Pleistocene era This formation dips gently towards the gulf. The formation also underlies nonrelated soils on the coastal area that consist primarily of clays silts, and sands which were deposited, in fluvial (river-derived) environments.

Information concerning the area soils was obtained from the U.S. Soil Conservation Service 1976 Soil Survey of Harris County, Texas, Sheet #45. The site lies within the Clodine Loam, a soil that occurs in nearly level terrains, is poorly drained, and exhibits moderate permeability.

Groundwater Characteristics

Groundwater occurs in two main aquifers, the Chicot and the Evangeline Aquifers. The Chicot is the shallowest aquifer that produces sufficient quantities of water for domestic, commercial, and light industrial purposes the Houston area. Both aquifers dip gently toward the coast. Shallower groundwater is also encountered in this area of Houston. Typically, the shallow water-bearing zones are first encountered at depths of 10 feet or more below ground surface.

b. Wetlands

Not within the scope of work.

5.4 Historical Use Information on the Site and Adjoining Property

a. Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were not available for this part of Houston.

b. Aerial Photography

Seven (7) sets of aerial photographs were obtained and reviewed for 1944, 1953, 1969, 1979, 1986, 1995, and 2002. (Appendix A)

- The aerial photograph shows the area to be in a rural and undeveloped area. Hempstead Highway, a major thoroughfare at the time, is easily visible. The major rail line that runs parallel to Hempstead Highway is also visible. Interviews with area residents say property was mostly undeveloped and used for grazing cattle or farming. Evidence of Fairbanks-Rosslyn Rd. (Pinemont) is present.
- 1953 The aerial photograph shows minimal development. Like the 1944 photograph, major thoroughfares are clearly identified.
- 1969 The aerial photograph shows commercial/industrial structures beginning to appear near project site. There is also evidence of more urbanization of the area. Clark Road is clearly visible. Site is un developed.
- 1979 The aerial photograph shows extensive residential development to the south and west of the site and commercialization throughout the area. There is also evidence of expansion of Hempstead Highway. Industrial and Commercial development to the north and east of site is clearly evident. Southern portion of the site appears graded but vacant.
- 1986 The area appears mostly unchanged. Site property appears to be clear of overgrowth but remains vacant.
- Like the 1986 photograph, the general area remains mostly unchanged. Site property appears overgrown but vacant.

2002 Like the 1995 photograph, the general area remains mostly unchanged. Site property appears overgrown but vacant.

c. Historical Directories

A City Directory Search revealed that in 1984, 1980, and 1976, properties in the 4400 block of Clark and the 12900 block of Hempstead Highway were composed of commercial/industrial, residential and vacant listings. In 1967 the above described properties are listed as residential and vacant. In 1959 and 1955, Clark Street was not listed and the 12000 block of Hempstead is residential listings. (see Appendix C)

6. SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

Site reconnaissance was performed on September 17, and 18, 2004 by automobile and on foot. Purposes of the site reconnaissance were to observe the site and adjacent sites for characteristics, spills, corrective actions, and other potential environmental concerns, and to document present land uses. Photographs taken during the site reconnaissance are included in the report. On our visit, we visually and physically observed the properties and structures described within this report.

6.2 General Site Setting

The project site was easily identified as vacant commercial site. The site was overgrown with vegetation and debris. Shrubbery and vegetation were also visible on adjacent property.

Access to the site was restricted. A tract of land lies between Hempstead and the southern boundary of the property. The eastern property line bounds the western side of Clark.

Approaching the site, driving east on Hollister (Hollister turns into Clark at the Pinemont intersection.), the general area was observed as a well established, mixed commercial and industrial neighborhood with evidence of rail activity in the vicinity.

The southern boundary of the property was inaccessible. The eastern perimeter of the property was visible for the parking area of the business to the east.

6.3 Exterior Observations Not applicable.

6.4 Interior Observations Not applicable.

7. INTERVIEWS

7.1 Interviews with Owner Not Applicable

7.2 Interview with Site Manager Not Applicable

7.3 Interviews with Occupants Not Applicable.

7.4 Interviews with Local Government Officials

The Houston Fire Department Hazardous Materials (HAZMAT) division was contacted to provide response information for the project site and surrounding areas for this report. The list of Response Team incidents from January 1 994 through October 19, 2004 is included in Appendix C.

The data provided did not list HAZMAT response that adversely impact project site.

7.5 Interviews with Others

Interviewed area business owner at MET Company, 12922 Hempstead, who requested to remain anonymous. He stated he was only leasing and referred me to building owner, Mountain Properties, Inc. -12922 Hempstead Road. Mr. Randy Scull, manager, was interviewed and verified that the project site has been vacant for many years. Mountain Properties is a printing company. That does not dispose of waste on property. It is transported in drums. Mr. Scull stated that Mountain Properties has been in the building for three years and has no knowledge of what activity was carried out before then. I attempted to interview personnel at PFS Properties. On every visit the gate was locked and could not gain access. A telephone directory search was completed and a Harris County Assumed Name Search without success. An environmental questionnaire was mailed but had not received a reply by the time the report was submitted.

8. FINDINGS

Recognized environmental conditions are defined by ASTM as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into structures on the property or into the ground, ground water, or surface water of the property".

A total of nineteen (19) sites at fourteen (14) locations were reported. Two (2) ERNS, and four (4) LUSTs, ten (10) USTs, and three (3) VCPs. Although there were four (4) citations of LUSTs within a ½ mile area, regulatory data and interviews reveal no evidence of past land use that would cause an environmental concern at subject site at the present time.

9. OPINIONS

Based on the information obtained in this study, TLC, Inc. is of the opinion that there is no potential for soil and/or groundwater contamination to impact the project site.

10. CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-00 and the City of Houston ECRE on the proposed project site. Any exceptions to or deletions from this practice are described in Section 2 and 11 of this report. This assessment has revealed no evidence of past land use that would cause an environmental concern at subject site at the present time.

11. **DEVIATIONS**

Other than a very slight deviation in search distance, to comply with City of Houston Department of Public Works and Engineering ECRE Standard Practice (3/23/98), (See Appendix C), which is allowed for in the ASTM Standard Practice E 1527-00, this study did not deviate from the ASTM Practice. Search radii for

environmental database information were five hundred (500) feet instead of directly adjacent or one half (.5) mile for all records except NPL, CERCLIS, and State Superfund, which was one (1) mile. Chain of Title records were not included and were not required.

Preface

This document of environmental concerns near 4400 Block of Clark Road, Harris County, TX reports findings of the TelALL data search, prepared on the request of TLC Engineering.

TelALL Corporation (TelALL) has designed this document to comply with the ASTM standard E 1527 - 00 sec.7.1.3 (Accuracy and Completeness) and has used all available resources but makes no claim to the entirety or accuracy of the cited government records. Our databases are updated at least every

90 days or as soon as possible after publication by the referenced governmental agencies (ASTM 1527 - 00 sec. 7.1.7). The following fields of governmental databases may not represent all known, unknown or potential sources of contamination to the referenced site. Many different variables effect the outcome of the following document. TelALL maintains extremely high standards, and stringent procedures that are used to search the referenced data. However, TelALL reserves the right at any time to amend any information related to this report.

If there is a need for further information regarding this report, or for any customer support please call TelALL at 800 583-0004 for assistance.

This report is divided into the following components:

MAP Identified geocodeable findings relative to this data search.

SUMMARY 1 Sorting of the identified sites by distance from the subject site.

FINAL A description of each database and a detailed explanation of findings.

SOLVENTS, PAHS. THE TYPE OF MEDIA AFFECTED: SOILS. TYPE OF REMEDY: NOT REQUIRED.

REQUIRED

APPLICANTS NAME: THE RREEF FUNDS. THE CONSULTANT/ATTORNEY IS DELTA

ENVIRONMENTAL CONSULTANTS, IN (TEL) 713-647-6263.

TXIOP

Innocent Owner/Operator Program

The TX IOP, created by House Bill 2776 of the 75th Leg, provides a cert. to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not loc. on the prop., and they

did not cause or contribute to the source or sources of contamination. Like the TxVCP Prog., the IOP can be used as a redevelopment tool or as a tool to add value to a contaminated prop. by providing an Innocent Owner/Operator Certificate (IOC). However,

unlike the VCP release of liability, IOCs are not trans. to future owners/oper's. Future owners/oper's are eligible to enter the IOP and may rec. an IOC only after they become an owner or operator of the site.

The above description were taken from the TCEQ/IOP Website. (http://www.TCEQ.state.tx.us/permitting/remed/vcp/iop.html)

THE STATE OF TEXAS \ KNOW ALL MEN BY THESE PRESENTS:

 $^{0}\eta^{0}$ 

That We, GEORGE F. RUSSELL and wife, RUTH B. RUSSELL, both DEED RECORDS residents of Harris County, Texas

027-26-0039 VOI 5861 PAUL 386

hereinafter called Grantors whether there be one or more parties executing this deed, for and in consideration of SIXTY-ONE THOUSAND THREE HUNDRED and NO/100-----

_____ DOLLARS (\$ 61,300.00

.

paid to Grantors by the CITY OF HOUSTON, the receipt of which is hereby acknowledged, have GRANTED, SOLD AND CONVEYED and do by these presents GRANT, SELL and CONVEY unto the CITY OF HOUSTON, a municipal corporation situated in Harris County, Texas, fee simple title in and to a tract of land, containing 8.69 acres, being a part of Tract Eight (8) of the Re-Subdivision of the William C. Wallace Survey that lies North of the H. & T. C. R. R. Co. right-of-way (according to the map of said right-of-way, recorded in Volume 572, Page 349 of the Deed Records of Harris County, Texas) in the City of Houston, Harris County, Texas, and being all of that tract of land conveyed to Russell Engineering Corporation by Deed recorded in Volume 3750, Page 344 of the Deed Records of Harris County, Texas; said tract of land being more particularly described by metes and bounds as follows:

BEGINNING AT A POINT, the intersection of the North line of Hempstead Road with the West line of Clark Road, said point lying North, 51.90 feet of the original Southeast corner of said Tract Eight ( $\ddot{e}$ );

THENCE North, along the West line of the fifty (50) foot wide right-of-way of Clark Road, a distance of 1,398.30 feet to a point, said point lying South, 147.50 feet from the original Northeast corner of said Tract Eight (8);

THENCE West, a distance of 295.2 feet to a point in the West line of said Tract Eight (8), said point lying South, 147.50 feet from the original Northwest corner of said Tract Eight (8);

THENCE South, along the West line of said Tract Eight (8), a distance of 1,154.00 feet to a point in the North line of Hempstead Road, said point lying North, 51.70 feet from the original Southwest corner of said Tract Eight (8);

THENCE South 50° 25' East, along the North line of Hempstead Road, a distance of 302.1 feet to the POINT OF BEGINNING.

#### SUBJECT: ENVIRONMENTAL SITE ASSESSMENTS PHASE I

#### 1. PURPOSE

This procedure provides guidelines for conducting Phase I Environmental Site Assessments for land involved in City of Houston real estate transactions, interdepartmental transfers, or construction projects, as well as rights-of-way which will be involved in City of Houston construction projects.

#### 2. APPLICATION

This procedure is to be used by all divisions involved in engineering/design, real estate, construction management, and also City consultants and subconsultants.

#### 3. OBJECTIVE

The objective of this procedure when used for real estate transactions is to discover any existing potential adverse environmental conditions consisting of the presence of hazardous substances or petroleum products on the property in question and adjacent properties, prior to the transaction.

For construction projects, the objective is to document environmental conditions of construction zones and areas immediately adjacent to the construction zone that could impact the design, construction or performance of a proposed construction project, prior to the design of the project and the solicitation of the bids.

### 4. BACKGROUND

Since 1994, the City has maintained the policy of requiring that a Phase I Environmental Site Assessment (ESA) be conducted on property to be acquired and on construction projects involving excavation or installation of underground utilities located in City rights-of-way. Some of the ESAs were performed in-house by City personnel and others were performed by private consulting firms working under contract to the City or as a subcontractor. Previous standards and guidelines for ESAs developed by the City have relied upon generally accepted, industry standard practices or upon the Standard Practice developed by the American Society for Testing and Materials (ASTM), first published in 1993 and subsequently revised in 1994 and 1997.

As time has progressed, it has become evident that in certain situations additional information beyond the minimum required in the ASTM Standard is appropriate. Other situations suggest that the ASTM Standard requirements are excessive for certain types of projects. In order to provide guidance to those persons and firms

Department of Public Works & Engineering

for facilities that are located within approximately 1/4 mile of the site. (The database is regularly updated and is accessible on the Internet at http://www.tnrcc.state.tx.uslwaste/pcd/vcp/index.html#database)

- 5) If buildings or structures are located on the site which were built before 1960, the ESA shall include a statement from a qualified asbestos/lead professional giving a list of observed suspect asbestoscontaining materials and lead-based painted surfaces. If materials generally known to be asbestos or lead containing (i.e.: 9" x 9" floor tiles, transite panels, or floor paint striping) are observed, specific mention should be made with quantities estimated.
- 6) If the site includes undeveloped property which will be developed1 available wetlands maps shell be obtained and reviewed, the presence of hydric soil types shall be reviewed using published information, and the presence of standing or flowing water shall be investigated during the site inspection. The environmental professional shall make a statement in the report concerning the potential for the presence of wetlands on the site and whether a full wetlands determination or delineation is recommended.
- 7) In addition to the interviews required in the ASTM Standard Practice. interviews shall also be conducted with owners or occupants of off-site facilities within 500 feet of the site as follows:
  - a) All commercial businesses that typically use hazardous chemicals or petroleum substances, such as dry cleaners, photo developers. mortuaries, and automotive service centers.
  - b) Selected or representative commercial establishments that do not typically use hazardous chemicals or petroleum substances,
  - c) All facilities identified in the regulatory records review, and
  - d) All industrial facilities.
- 8) If the site is in an area of known oil and gas production operations a record search for oil and gas exploration and production wells on or adjacent to the site shall be included In the ESA.
- 9) The environmental professional who conducted the ESA shall make recommendations for Phase II testing, as appropriate which shall be thorough enough to support a Phase II ESA.

## Department of Public Works & Engineering

- 4) If regulatory records indicate that a federal superfund facility is located within approximately ¼ mile of the site, the files maintained on that facility by the public library shall be reviewed and summarized in the ESA report. (Files are available in the Government Documents Section of the Central Houston Public Library, 500 McKinney, Houston.)
- 5) The TNRCC's Voluntary Cleanup Program database shall be searched or facilities located within approximately 500 feet of the right-of-way, (The database is regularly updated and is accessible on the Internet at http://www.tnrcc.state.tx.us/waste/pcd/vcp/index.html#database)
- 6) Interviews shall be conducted with owners or occupants of facilities directly adjacent to the right-of-way as follows:
  - All commercial businesses that typically use hazardous chemicals of petroleum substances, such as dry cleaners, photo developers mortuaries, and automotive service centers,
  - b) Selected or representative commercial establishments that do not typically use hazardous chemicals or petroleum substances,
  - C) All facilities identified in the regulatory records review, and
  - d) All Industrial facilities.
- 7) If the site is in an area of known oil and gas production operations, an oil and gas survey shall be included in the ESA.
- 8) The environmental professional who conducted the ESA shall make recommendations for Phase II testing, as appropriate, which shall be thorough enough to support a Phase II ESA.

#### 6. ADMINISTRATIVE CONTROLS

- A. <u>Maintenance Responsibility</u> Responsibility for updating this procedure is assigned to the Environmental Engineering Section of the Facilities Division.
- B. <u>Filing Procedures</u> This procedure is to be filed numerically with other Standard Practices in the Project Manager's Manual and in the ECRE Procedures Manual.

# Houston Fire Department Search Request

**187** / 13-928-616U

Following are all incidents at the requested location to which the Hazardous Materials Response Team responded from January 1, 1994 through today's date; they are not necessarily the only spills that may have occurred during the period of time. This report has been furnished by the Hazardous Materials Response Team. Contact person is Senior Captain Troy D. Lilley, phone number (713) 928-6711; FAX number (713) 928-6160.

NOTE: HMRT does not maintain records for locations outside of the City of Houston.
